

CBRN Education: The Needs

Dr Jean Pascal Zanders

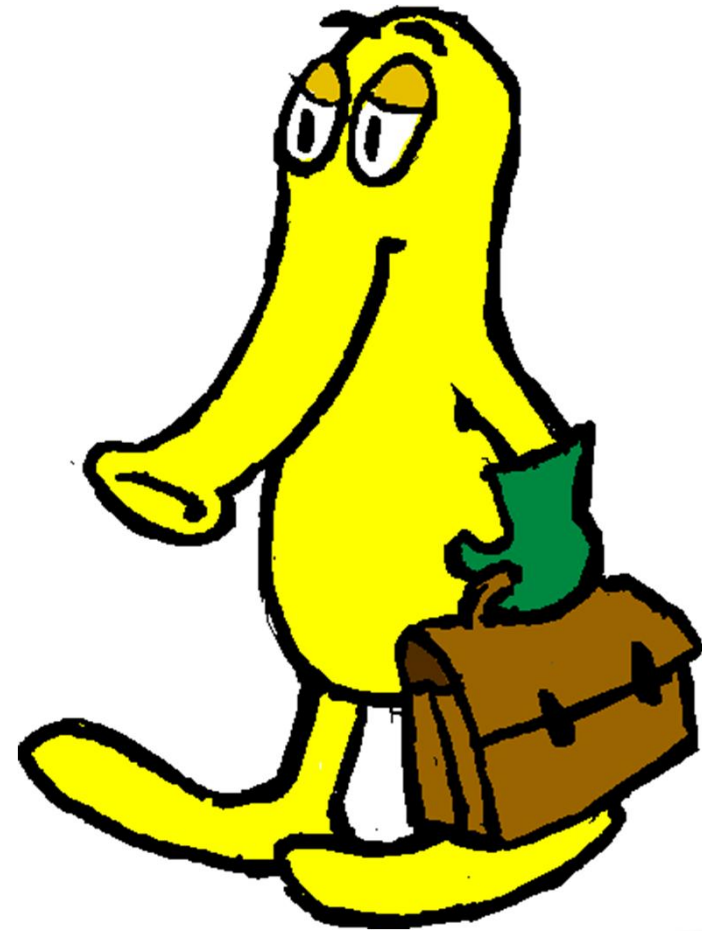

The Trench

*Challenges of Scientific and Technological Evolution for Export Control Systems
Seminar organised by the International Science and Technology Center (ISTC) with the
Ministry of Investments and Development of Kazakhstan
Astana, 24 – 25 May 2018*

Core objectives of CBRN education

- What elements do you think are necessary to build up capacities to prevent illicit CBRN technology transfers?
- Who would be the primary target audience for each of those elements?
- For which of those elements / target audiences would you recommend:
 - Outreach?
 - Education?
 - Training?
 - Train-the-trainer approaches?
 - Other approaches?
- Which capacities should be developed as a matter of priority?
- Who should take charge?
- What would prevent you from undertaking these priority objectives?

Thank you!
